

Simplicity
Kona Major One

£1ba (due October 09) | www.konaworld.com

Cyclocrossers are people who put knobby tyres on road bikes and (attempt to) ride them in frenetic, short-course off-road races. Generally in winter, so it's good and muddy. They are, then, clearly masochists. This Kona represents a new pain fix for them, as if the odds weren't already stacked against riding a skinny-tyred, rigid-framed bike in mud, this one's singlespeed. It's beautifully made, with a lightweight Scandium frame, but it's still surely the most inefficient way to ride off-road ever. Yes, we want one.
